

DHARANEESH V

dharaneeshv7305@gmail.com | 7305206650 | Leetcode | LinkedIn | GitHub | HackerRank

Summary

To begin my career in Full Stack Development while leveraging Machine Learning and Deep Learning to build intelligent, scalable applications. Passionate about solving real-world problems, continuously learning emerging technologies, and delivering high-quality software solutions.

Skills

Programming languages

Java,C,python

Frontend

HTML,CSS,javascript

Backend

node js,express js

Database

mysql,mongodb

Tools & Technologies:

Git, GitHub, VS Code, IntelliJ IDEA, Postman

Machine learning&Deep learning

TensorFlow, LSTM, CNN, Natural Language Processing (NLP)

Libraries

NumPy, Matplotlib

Core

Data Structure and Algorithm

Education

Bachelor of Technology,

Kongu Engineering College

2024 – 2028

CGPA: 8.52

State board,

Blue bird matriculation higher secondary school

2022 – 2024

- 10th: 90%
- 12th: 93%

Projects

ADS-B Anomaly detection

Developed an ADS-B Anomaly Detection System using machine learning to identify abnormal aircraft behavior from real-world aviation data. Processed and preprocessed flight parameters, applied the Isolation Forest algorithm for anomaly detection, visualized flight trajectories, and evaluated model performance using standard metrics to ensure robust detection.

AI-Powered Customer Churn Prediction System

Developed an AI-powered Customer Churn Prediction System using Python, Flask, TensorFlow (LSTM), and Scikit-learn to identify customers at risk of leaving. Implemented Explainable AI (SHAP), customer retention recommendations, and CLV estimation, while building a RESTful API with a React dashboard for real-time predictions and business insights.

AML suspicious transaction detection

Developed an Anti-Money Laundering (AML) web application using FastAPI, React, and Vite with LSTM models to detect suspicious financial transactions. Built a real-time risk scoring system, integrated RESTful APIs, and developed an interactive dashboard for transaction monitoring and fraud detection.

Area of Interest

- Full Stack development
- Artificial intelligence & Machine learning
- deep learning

Participations

hackvotrix hackathon

2025

CIT,Intelina hackathon

2026 | coimbatore

Language

- English
- Tamil
